

Good Afternoon, I wish to express my profound appreciation for the awareness Ardee School is creating regarding the alarming and continuous decline in the quality of air and the actual reasons behind it.

As I read the update on the recent paddy burning/ pollution issue, I realized that Ardee School does not shy behind usual replies and responses but stands up and fight for the health and well-being of its students.

I feel proud being an Ardee school Gurugram parent, as I realize that my ward not only is aware of the Situation, but is a part of the movement wherein she demands the rectification of the situation. After seeing the updates on the climate control march which was taken by the Ardee Students twice during the past months, I know that my daughter is receiving much more beyond school education. She is growing into a true Global citizen.

I would also like to thank you and Ardee School Gurugram heads for making Ardee Campus a safe place wherein students can come without me worrying about the Air quality, as I know that Ardee School maintain healthy Air quality indoors and makes sure that during red days students involve in various indoor sports and games activity and no aspect of learning process is compromised.

Thanks and Regards,

Swati Sharma,

(Parent of Lavanya Sharma Year 5)
